

## LION-1000YC-DIESEL-TRI-Série 2-Euro 3-

Dimensions :

L : 5 800 mm I : 2 250 mm H : 2 580 mm

Weight: 8 950 kg

4.6

V6

30/08/2018

#### PRODUCT CODE : PRO12144

## **1 - GENERAL DATAS**

GENERAL DATAS							
PRP Prime Running Power	900 kVA/720 kW	Fréquency		50Hz			
ESP Emergency Standby Power	990 kVA/792 kW	Number of phases		3			
Voltage	230 400V	Acoustic pressure level at 7m		< 86dB(A)			
Power factor (cosΦ)	0,8	Fuel tank autonomy at 75%		7 h			
Rotation speed	1 500rpm	Fuel tank capacity			1 000L		
ENGINE				ALTERNATOR GELEC			
Model	YC6C1220-D31			Amperage	1	300,60 A	
Number of cylinders	6	Technology AVR			Brushless, With Electronic Regulation STAMFORD		
Governor type	Electronic			ST			
Specifications	4 stroke cycle engine, direct f injection , liquid-based coolir			E	ectronic		
Displacement	39,58L	IP Protection			23		
Maximum standby power at 1500 tr/min	897 kW	Insulation class			Н		
Engine starting type	Electrical 24 V						
Fuel consumption at 75%	141,8 L/h			CIRCUIT BREAKER			
Air inlet system	Turbo-charged & water- intercooled	air		Type Four poles thermal magnetic circuit breaker			
Oil capacity	150L				Dicc	DIGUNGI	
Radiator engine capacity	NCL						
DEEPSEA CONTROLER						LIFTING :	

By forks or straps

Accessories not included

GELEC Energy Head Office : 60 chemin Borie 13821 La Penne-sur-Huveaune (France)

-

Model

**Applications** 

**Technical and commercial services :** 7 rue du Bois 22120 Yffiniac (France)

DSE6020MKII

Automatic start / stop of

generators, power losses detection, scheduler

# **2** - AVAILABLE OPTIONS

#### 1 - PLUGS SETS

Plugs sets integrated without flood (no projections) equiped with a circuit breaker for every single plugs, a differential switch and a stainless steel bulkheads.

#### Choice of :

- o 1rst Type : 3-phase plug 16A single phase 16A taken
- 2nd Type : Taken 32A + 16A three-phase 3-phase 16A taken
- 3rd Type : Taken 63A + 32A + 16A three-phase 3-phase 16A taken
- 4th Type : Powerlock

#### 2 - TANK

PEHD TANK	DESCRIPTION	DIMENSIONS/CAPACITY
	aerial tank (tank applied for interior) Double skin, high density polyethylene (HDPE) containment tank completely sealed and stable.	<b>750L</b> : 1200x660x1685 mm - 46kg <b>1000L</b> : 1420x660x1885 mm - 59kg <b>1500L</b> : 1720x770x1920 mm - 90kg <b>2000L</b> : 2200x770x1800 mm - 145kg
GALVANIZED STEEL TANK	DESCRIPTION	DIMENSIONS/CAPACITY
	Metallic tank (usually used for trailers) Double skin, integrated containment tank, HDPE inner pouch, galvanized steel outer shell.	<b>700L :</b> 1135x757x1210 mm - 65kg

According to the distance between the genset and the tank, a fuel transfer pump can be necessary.

## **3** - II

# INTEGRATED SOURCE INVERTER

#### This system permit the automatic start of the genset in case of power faillure.

Assembly comprising the board, the switch and the connection terminal board.

### OFFSET SOURCE INVERTER IN BOX

The offset source inverter in box is an option just from 9 to 180 kVA and standard from 200 kVA.

Technical and commercial services : 7 rue du Bois 22120 Yffiniac (France)
